Title:

Comments: As a lifelong local, I have seen many changes to Targhee since I began skiing there 48 years ago; yet Targhee has been able to remain a wild, beautiful, family-friendly place. I strongly oppose the proposed expansion that would alter this. The impact on a pristine landscape that can never be returned to its natural state, the changes to the surrounding community including increased noise and light, as well as the cost of disruption to animal life are all too great a price to pay. It would be tragic to allow such irreversible damage to our wilderness ruining it for innumerable members of future generations so that - in the present - a few may profit monetarily. Please consider carefully and preserve what cannot be replaced.
