Title:

Comments: I support the development of the Sandia Peak Ski Area Mountain Coaster #56985. It would allow for year round enjoyment of the existing ski area and enhance the recreational opportunities in the community. Many of the ski resorts I have frequented have a coaster as well as other summer entertainment features such as climbing walls, alpine slides, bike hauls and trails, zip lines, mini golf, obstacle courses, etc. Such activities give parents an occasion to entertain their families and instill an appreciation of being outdoors and living a healthy lifestyle. It would fully complement and enhance the existing ski area, hiking trails and restaurant and provide needed summertime recreation in Albuquerque and surrounding communities.
