Comments: To Whom it may concern,

I support the FOCCC south fork project in many ways. I feel it will be a safer and better managed area with the improvements that are proposed in the current plan. This plan should also help the local businesses that are struggling through a horrible year with little tourism or income. I have always felt that well organized and thought out progress is the best we can ever hope for. I wish we would see more projects around our country as well thought out as this one. Bob Ashley Director Chiricahua Desert Museum
