Title:

Comments: - Since this is an all or nothing proposal, I support NO ACTION, Plan A Alternative.

- I suggest a longer review period to allow more voices to be heard

- I suggest other alternatives rather than all or nothing. There are certainly SOME needs, but not all of those currently proposed.

- I find it inconceivable that anyone is considering plans that actually result in destroying part of this Important Bird Area (IBA). We already have a disturbed area at the end of the current road that could be used.

- I support closing the road during peak season (soft closure) to protect the fragile wildlife area. We do NOT need more vehicular traffic in the canyon.

- I have read a number of the comments and urge that the alternatives presented in many of them be considered as opposed to the current plan.

- I do regret that this proposal has divided our close-knit community, but protecting this fragile area is of the utmost importance. Hopefully, a reasonable compromise can be reached.
