Comments: E-bikes are just another form of motorized vehicle, and permitting them will open the doors to gas-powered motorbikes, ATVs and everything that comes with them (pollution, litter, etc). There is already plenty of land on which motorized travel can take place, please do NOT permit E-bikes to go where currently only human-powered bicycles can go. Modern bicycle technology is already absurdly capable of taking even a modestly fit person a great distance, there is absolutely no need to allow e-bikes in addition.
