Comments: E-bikes are just another form of motorized vehicle, and permitting them will open the doors to gaspowered motorbikes, ATVs and everything that comes with them (pollution, litter, etc). There is already plenty of land on which motorized travel can take place, please do NOT permit E-bikes to go where currently only humanpowered bicycles can go. Modern bicycle technology is already absurdly capable of taking even a modestly fit person a great distance, there is absolutely no need to allow e-bikes in addition.
