Comments: I would like to have trails that are approved for mountain bikes be accessible to pedal assisted e-bikes as well. They do not have a throttle and wouldn't have any more impact on the trails. I just ordered my e-mountain bike and am making the switch due to a chronic illness that makes uphill difficult for me now. This will keep me more active and healthy and continue to do something I love. I would hate to see many great trails be off limits.

Thank you for considering this.
