Comments: The issue with a carnival roller coaster on the Sandia crest is not whether it will increase numbers of visitors because it surely will, and that includes the impact these visitors will have on facilities and the surrounding forest(trash graffiti etc.). The issue will be the plan to "remove" the roller coaster when it's useful lifetime is over. If there is no removal fund set up in the beginning we will be left with an equipment mortuary on our beautiful mountain crest for generations.
