Comments: I've been riding mountain bikes for years. As of a year ago I had have knee replacement at 50 years old. It's better but still have issues with pedaling up hill, so I purchased an e mountain bike to help with that issue. There are a few trails on blm lands that I can ride on. It would be nice to have more access to others as well. My bike is a class 1 which means of course pedal assist only. There does need to be clarifications as to what class of e-bikes can be where. It's not about how fast I can go to get to the top of the hill but being able to get there and being able to ride still.
