Comments: Allowing e-bikes will only lead to forest erosion from trails the bikes will make. In our california deserts, bikes, sand buggies and other powered vehicles have destroyed much desert terrain. They have also provided unwanted access to archaeology sites which are also being defaced and destroyed. Our national parks are meant to stay pristine and not destroyed by inventions that can lead to destruction of habitat. Hikers don't need to be crowded off of trails etc by those who choose not to walk to enjoy mother nature
