Title:

Comments:

Please leave our forests, nature on our public lands in peace. Do not disturb wild life.

There are plenty spaces in already "developed" areas for these recreational activities like noisy, motorized vehicles, including electric bicycles.

Please, stop destroying our planet! We desperately need to reset fundamental relationship with the natural world and rethink our place in it and treat our planet and ALL its inhabitants with respect for its sake and ours.

If we don't take care of nature, it will take care of us, it will fight back.

All the previous and future deadly bacteria and viruses were/are man-enabled!

Please realize this fact!! Your job is to protect our NATURAL public land.

Please fulfill your obligation!!!
