Comments: Again, I write to the Forest Service to reiterate that I am against the use of e-bikes in the Tongass National Forest. especially for recreational use. There are a variety of environmental damages that come with opening areas for e-bikes.

1) The sounds of this machine are an environmental nuisance to wildlife and to people trying to enjoy hiking trails and pathways and just to be serene in nature.

2) Destruction of the forest may be have to be made to plan the building and construction of special trails and pathways for e-bikes.

3) The exhaust fumes of any fossil fuel motorized vehicle in the Tongass National Forest are of no good to any being.

Please, let Nature be Nature for creatures and humans to enjoying peace.

NO TO RECREATIONAL E-BIKES IN TONGASS.
