Comments: I ride a class 1 pedal assist ebike mountain bike in southern calif. And am enthusiastically committed to convincing the powers that be that ebikes do NOT damage trails, are NOT dangerous(any more that any other mountain bike) and allow my 62yo self to participate on the sport I love with my younger counterparts. For me it just evens the playing field. Without my ebike I would be stuck with MUCH less riding and much less enjoyable rides.

So please allow access to class 1 pedal assist ebikes to any trail that regular mountain bikes are allowed on...it is only fair and the right thing to do.
