Comments: I run the Trails and Wilderness Program for the Salt Lake Ranger District, and I strongly support these directives. Identifying ebike classes and allowing for management via the MVUM will greatly enhance our ability to provide a range of recreation opportunities to diverse users.

I foresee our district will move quickly to:

- identify which existing trails are appropriate for ebikes.
  - identify trail improvements that would make additional trails appropriate
  - gather public input about potential new trail needs
  - add these trails to our MVUM
  - install signage and push public messaging that will direct users to only those trails where ebikes are allowed.
- other trails we will enforce non-motorized use.

Thanks for the tools!
