Comments: I have visited & enjoyed Cave Creek Cyn. many times (even years ago when I lived in San Diego and later when I lived in Sierra Vista, Tucson & now Prescott). I recall at that earliertime that camping was permitted there (at the road end) and was pleased to find later that this had been abolished in favor of lower level use (hiking & picnicking) only. Most of the proposed changes (except the restroom) will only desecrate this beautiful, pristine area and must be rejected. This is a priceless natural treasure and must be preserved in as natural state as possible to enhance the unique biota of the Chiricahua Mts. Indeed, this entire area should be preserved intact as part of the Chiricahua National Monument.
