Comments: I'm a frequent visitor to Cave Creek Canyon and would like to express my support for the proposed South Fork Day Use Area project. Key features that are much needed include the vault toilets, picnic tables, additional parking and the handicapped accessible nature trail. This project would be replacing facilities that existed for decades with the addition of handicapped accessibility.

I am opposed to the seasonal closing of FSR 42E. The closure would further reduce available parking during the busy season. I would be in favor of taking steps to reduce the speed limit to 10 mph which could include water diversion bars. This would greatly reduce the dust and increase safety for all concerned.
