Comments: This outrageously bad proposal is a slap in the face to anyone who cares about the integrity of public lands. I am certain that this proposal is a result of the ongoing assault on the legacy of American's laws to protect what is left of our natural environment. The Trump administration is not legitimate and does not represent the will of the American people. Steve Daines and Greg Gianforte are sycophant followers of those richest 1 percent in our country who are selfish, racist old white men, who hopefully will be voted out of any authority soon.

Just so I am understood, e-bikes have no place in national forests, national parks, or BLM lands that do not already permit motorized use.

I note that your notice says "We are seeking comment only on the changes to the directives and not on the full text of the directives" What does that mean? Is it subterfuge to discount our comments?

See you all in court.
