Comments: I fully support access for Class 1 eBikes on all trails that permit bicycle access. I would also encourage expansion of recreational opportunities for bicyclists and eBikers by opening up more trails to them. We have an obesity CRISIS and a mental health CRISIS in our country, and countless studies have proven that access to open spaces and exercise are an excellent way to deal with both challenges. Additionally, Class 1 eBikes have no additional environmental or user impact versus a traditional bicycle.
