Comments: The short response is absolutely not, no electric bicycles! Why on earth would you even consider allowing electronic bicycles? I cannot comprehend what kind of leadership this is? Electric bicycles should not be allowed anywhere on or in our national forests at all. Not only are they not safe, but people are not responsible. You're seeing across the country the problems we are having with these electronic bikes. Why on earth would you want to bring them to some of the last places on earth that are supposed to be peaceful and beautiful and serene! Our national forests, the environment, the wildlife, the animals, the birds, this is sacred - this is no place for electric bicycles! Let's start to get our brains back to some normalcy, and stop electric bicycles from going anywhere near our national forests!!!! It's that simple. Let me repeat, it's that simple, absolutely not no electric bicycles. Wake up! Enough is enough!
