First name: Dr Rin

Last name: Porter

Organization: Defend Our Parks LLC

Title: Communications Director

Comments: Thank you for the opportunity to comment. We at Defend Our Parks LLC oppose the use of e-bikes in National Forests and Designated Wilderness Areas. We oppose the use of motorized vehicles, especially Over the Snow Vehicles (OSVs) in roadless areas. We oppose the construction of trails for e-bikes. We oppose the use of mountain bikes in roadless areas. We oppose the use of motorized vehicles on hiking trails or bicycle trails.

That said, we support the use of regular bicycles on designated bicycle trails that already exist in National Forests. We support hikers' access to hiking trails that already exist in National Forests.

We oppose the construction of new hiking trails in National Forests and designated wilderness areas, because we believe that the intrusion of humans into these areas has gravely affected wildlife and made it more difficult for wildlife to survive.

We believe it is important to consult with all affected jurisdictions in making new rules or revising old rules, and we support USFS in its efforts to consult with other jurisdictions and stakeholders, especially with indigenous nations and groups.
