Comments: Thank you for reviewing you ebike policy. I have been riding mountain bikes since 1983 and am now 68 years old and still love to ride. I recently purchased a class 1. EMTB and love it. I have the option of using very minimal electric assist (my favorite mode) and I can travel further this way. I find the riding experience to be very similar to a regular MTB. and there is nothing different from my riding experience except it is easier for me to ride up steep hills. My downhill speeds are no faster than a regular bike. I think class 2 & 3 should be restricted as these are truly motorized vehicles. Class 1. Is a peddle assist bike that give the rider added assistance based on cadence and leg power.

Thank you.
