Comments: At this time I am NOT in favor of using electronic bikes in state or national parks and in state and federal forest reserves. I have witnessed their proliferation on city streets. They are considered bicycles, but they can be as fast as licensed cars and motorcycles and are apt to be abused when going off road onto sidewalks and dirt paths. They put the serious bicycle rider, who must use muscle power, at disadvantage. Also they need at this time, unless solar powered, to be fed by the energy grid which most likely is fossil fuel sourced.
Thank You
