Title:

Comments: "Consider designating a class or classes of e-bike use, as appropriate, on NFS trails managed for bicycle use or where bicycle use is allowed, where effects from e-bike use would be comparable to effects from bicycle use. "

I believe Class 1 ebikes should be allowed on all NFS trails managed for bicycle use or where bicycle use is allowed. Class 1 ebikes are virtually indistinguishable from regular bikes and should be treated as such in my opinion. I believe this would allow many people to access public lands that they otherwise might not be able to.
