Comments: I have visited Cave Creek area as often as I can since I went to Grad school at AZ State UN in the 1970's. I have hiked the South Fork trail and and trails nearby and consider them some of the most biologically interesting in the region. I cannot hike as far as I used to. I support the EA to re-establish the small picnic area, and as much of the road as practical, consistent with over-arching ecological concerns. We plan to visit this area in 2021.
