Title:

Comments: We are annual visitors to Cave Creek Canyon because it is an incredible oasis surrounded by desert and offers a much desired break from winter in our home state Colorado. We support the creation of a new replacement picnic area if for no other reason than it will have much needed restrooms in an area with very few. As a senior citizen, the need for a restroom can cause an urgent situation which with no options, will result in the use of any available forest location. I know the picnic area will be used by many people visiting this area. - K & K from Colorado
