Comments: I feel that Class 1 eBikes (never even seen class 2or3 on a trail or in person) should be allowed anywhere regular bikes are allowed. I have both types, ride often, and I can say they no more damage as some would like to falsely state. As an older person, the eBike gets me on the trails more often providing the exercise I desire. I'm a tax payer and deserve to use the same trails as others. It would be discrimination to ban them as is stands now. It is the USER, not the bike if there ever would be a problem. There are mostly great users of all types on the trails and a few that can cause issue from all groups. Once again, it's the user, not the bike or type of trail user that would be an issue.

Please immediately allow the use of eBikes on all trails that bikes are allowed today. Not allowing a user group that pay taxes to use these trails is straight up discrimination. No other way to state the fact. Thank you
