Title:

Comments: I am opposed to the proposed South Fork Day Use Project. I believe that it will lead to overuse of this very special and very fragile habitat. I understand that the proposal may be in response to changes made in the area by flooding of the creek a few years ago. That is sure to happen again in the future. Nature is not static. Perhaps a vault toilet but certainly no picnic area or benches or man-made trail that would open the area in a way that does not protect the habitat or the birds and animals that live there.

Thank you.
