Title:

Comments: I have been an avid mountain biker / racer for 25 years. Spent countless hours building and maintaining trails. Over the last 3 years my riding has suffered tremendously due to unexplained joint pain and stiffness. Early in 2020 I got a diagnosis of Parkinsons, which explains the joint pain and stiffness.

Because of this condition I no longer can race. Did not want to stop socially riding so only way I could continue riding at the level of my riding friends is with a class 1 e assist bike.

I fully support access to all public land that allows bicycles to also allow ebikes that comply with current laws.
