Title:

Comments: Greetings,

I come in protest of the Gallatin Plan completely ignoring aviation and possible landing areas on the forest. With the 1000's of miles of trails, campgrounds, roads and nearly every other form of recreation is accepted or provided for, it is unreasonable that aviation has been ignored. The Recreational Aviation Foundation has been working with planners and recreational personnel on this forest for decades only to be told to no, there is no room, nor a suitable place for an airstrip. An airstrip is simply a trailhead that might utilize an area of 5 acres or less. I request an opportunity to come before this process.

John McKenna

Chairman Recreational Aviation Foundation
