Title:

Comments: Equestrians are opposed to ebikes on the trails.

Many ebike users are irresponsible and this causes accidents and injuries to equestrians and hikers.

Ebikes are silent and equestrians cannot hear or often times see them coming.

There are enough trails now available to ebikes. There is no further need to expand ebike trails. Outdoor enthusiasts have been enjoying the great outdoors for decades by horse or by foot with very low impact to the environment.

Any vehicle with tires motorized or not, destroys the terrain and spooks wildlife.
