Title:

Comments: As an older person I enjoy slow rides in the forest. I have never had a problem where I thought my bike did any trail damage. I have been riding MTB regular and Ebikes and found them to be very compatible together. As I said before the Ebike allows me to still get into the woods and bike safely. Seniors can enjoy greater mobility. Share the trails, we all want to enjoy them.

Class one, pedal assist bikes limited to 20 mph should be allowed in the National Forest.
