Comments: To whom it may concern;

I would like to request an extension on the comment period for review of the EIS regarding the Stibnite Mining Project. In an honest attempt to review the EIS, I believe we need the maximum amount of time allowed, and politely request that we are given an extension to the 120 day maximum. Looking at the amount of time allowed for the EIS to be written, as well the amount of information covered, it is a simple and easily attainable request that the comment period be extended.

Respectfully.
