Comments: I ride horses weekly in the Uinta Mountains. The motorcycles are already going off the Designated trails and following trails that herders have created. It is unsafe as motorcycles you can hear coming but sometimes it is hard to get off the trail before they meet. E Bikes will be worse a problem.

What is sad is you don't have enough employees to manage the forest as it is. Yesterday I met a side by side on a road that is closed (forest service service road) they went around the gate and through the creek. Been that way all summer seen the tracks But finally seen one of them.

E Bikes and motorcycles should be allowed with ATV only. Or on public roads not forest trails. If it is not ATV allowed.
