Comments: Class 1 ebikes is literally one of best things to happen to the bicycle industry.... not as it only helping many people Explorer trails that they could never otherwise see... It is also allowing people of different Fitness levels to ride together safely... it also allows those with injuries to be more mobile and enjoy the forest and trails.... I do believe the limit of 20 miles per hour is a key component and should be kept with that limit in mind... To ensure safety on all trails
