Title:

Comments: I am an older person who has health issues and without aid of an e-bike I would rarely be able to get out and enjoy nature. We need to adapt to developing technology to allow those who wouldn't otherwise be able to explore our beautiful National Parks. E-bikes are ecologically responsible, quiet and safe when ridden by anyone with an ounce of common sense and don't pose a threat or danger to anyone or themselves anymore than a regular mountain bike. Any safety issues or concerns can be addressed with speed limits, fines and or criminal charges in cases of extreme negligence or willful harm or endangerment.
