Comments: E-Bikes are safe, they don't destroy vegetation and are not so fast of a speed. They are limited by their battery, unless they are a power assist bike. These bikes will give people that have disabilities or walking issues a way to connect with nature, allowing them to go slow, while not destroying trails and is of benefit. they have single, tandem and 3 wheel trikes. I encourage the use of disability trails for to enjoy. These are a great alternative to ATV's, motor cycles and other gas powered vehicles that destroy trails.
