Title:

Comments: I am interested in participating in resolution discussions for the Custer Gallatin National Forest Land Management Plan Revision. I am a Pryor Mountain (hiker, hunter, wildlife watcher, and educator)and have conducted research in the Pryor Mountains with college students. I am concerned with wildlife escape terrain from motorized activity, soundscapes and the retention of Wilderness designations as a comparative element on the landscape from which to conduct studies on other management designated areas.

I object to the use of BCAs instead of RWAs for a number of reasons as mentioned above. These objections can be seen in my previous letter of objection submitted 6/6/2019.
