Comments: Ebikes are a great addition to the trail network. It lets people get out riding that might have had problems or just getting to old. I had a friend out in Park City Utah that stopped riding with me because he thought he was holding up the group. Once he got an ebike it changed his mind about riding with us. He lost weight and was loving biking again. I believe ebikes should be part of the use on trails. There should be educational class on ebikes for new riders. It should also be the local bike clubs and shops to teach proper rider etiquette on the trails.
