Comments: As a member of the Cascade community, I am not confident that the Stibnite Gold Project will benefit our community, of which I consider nonhuman animals, other organisms, and the land itself to be a part. In fact, I am confident that it will detract from our community. We must preserve this precious land. We must take measures to ensure clean air, water, and soil for our future generations. Despite the lofty claims of the EIS, I believe that the Stibnite Project poses a threat to all of these things. I am wholeheartedly against the project, as I think it will ultimately bring far more harm than good to our community. Thank you.
