Comments: I am not a NEPA expert but it is my understanding that one company cannot have two SOPA requests under consideration at the same time. Barksdale Resource currently has the SOPA request for the Sunnyside Side project. It has now come before the Forest Service with a second SOPA request with the San Antonio Project. Are they being underhanded by presenting the project under the name of IC Exploration LLC. The reality is that Barksdale Resources owns the San Antonio claims and therefore owns the project. I would ask the Forest Service to look into this matter and decide if the project is even legal to begin at this time.
