Title:

Comments: My name is Rachel Lightner, and I would like to request an extension for this document to be reviewed. A 60 day comment period, given the extraordinary circumstances of our country, is inadequate for a 5,700 page document that took three years to draft, and highlights the bias the administration had in preparing this document, the hope to quell public engagement, and is contrary to the intent of law for this review process. I am against the Stibnite mine project moving forward, a behalf of protecting our water ways and the environments impacted there of. Please do the right thing, extend this commenting period.
