Comments: I am completely for the use of class 1 ebikea in the National Forests. I and my wife have enjoyed the health and mental benefits of daily riding our ebikes. We can ride trails that we previously wouldn't even attempt on an analog bike. We take our ebikes along on vacation and look forward to using them even more when the NFS allows their entry. A few of our friends have tried out ebikes and wouldn't even have considered buying bikes til they tried our ebikes. They are riding almost daily now also.
