Comments: To whom it may concern,

I would like to firmly state my support for allowing Class 1 electric bikes on existing mountain bike trails. This will increase public participation and general populace health due to increased physical activity opportunities, and represents a unique opportunity for our national parks to increase funding and support.

I also recommend requiring a class 1 eBike permit for national park or forest access, which must be displayed on person or bike when in the parks. This will allow for increased funding to offset trail use, and allow for easy identification for ranger enforcement.

Thank you for reading my opinion, I hope you will take it into consideration.
