Comments: I have been mountain biking for 30 years, now at 58 I recently bought a class 1 mountain ebike. It has given me the opportunity to continue to ride at the level I once could. The biggest advantage is I'm able to extend my riding time by hours which allows me to reach more locations. With a class 1 mountain ebike I do not see any additional impact to trails than a normal mountain bike. eBikes are very quiet and make no more sound than a normal mountain bike on trails.

Please consider allowing class 1 mountain ebikes in national forests. I think this will allow more people to enjoy them, with no additional impact to the environment.

Thank you.
