Title:

Comments: I support allowing Class 1 E-bikes on all trails and land that currently allow traditional bicycles. Class 1 E-bikes have been shown to be a safe addition to existing trail networks and wilderness spaces. I also support continued and hopefully increased access for traditional bicycles and Class 1 E-bikes in National Forest land. These actions will increase public participation and general populace health due to increased physical activity opportunities. Thank you for reading my opinion, I hope you will take it into consideration.
