Comments: Class 1 electric mountain bikes are no different than standard bikes. I ride one with my 13 year old son and my son is faster on his standard bike. We ride in many states, both Eastern and Western. I don't understand why this is an issue at all? The comments about them being motorcycles or high speed and dangerous are laughable and incorrect. I do hope that you will actually look into this issue yourself. They're just bikes. If you're going to ban class 1 ebikes you'll need to ban all mountain bikes. I'll say again, class 1 bikes aren't any faster or different than a standard bike with a decent rider. I'm 60, I've been riding and building trails and involved in advocacy for 35 of those 45 years. I'm puzzled why this is even an issue?
