Comments: Class 1 electric bicycles are no different than standard bicycles. Forcing class 1 bikes on motorized trails is dangerous for riders and rises to the level of potential lawsuit material. Class 1 e mountain bikes are bicycles and ride and handle like bicycles and offer power assist that is lower wattage than a strong rider on a regular bicycle. If you wouldn't force bicycles on to motorized paths, why would you force class 1 ebikes? Class 1 ebikes belong anywhere a standard mountain bike belongs.
