Title:

Comments: Hi I wanted to take some time and tell you what I think about the stibnite gold project. I believe that this project while having many benefits for people could have some catastrophic consequences. As being a kayaker I feel that the river is a part of my life in many different ways. I believe for you to go messing with the river it could give some consequences that are worse than wanted. I appreciate you trying to involve yourself in the community as much as possible I just think that involving yourself deeply in the river could be a disaster. I admire your efforts to bring jobs in and help people and businesses as much as possible but I believe to an extent that again you should not mess with the river. I know the mining will be affected hugely but I still believe in what I have said above and try and find alternative ways that are environmentally friendly and help the community and the environment.
