Title:

Comments: 1: Does the segment of proposed trail that enters Fawnskin in map square 12 provide access to city streets?

2: It looks like the new North Shore trail will end near the the YMCA camp on 3N14 at its western end. Will there be public parking available there?

3: Will there be a fuels reduction effort as part of this plan? I ask this because I know that the south side of Delamar Mtn is very thick with vegetation. A fuels reduction project would be really great for Fawnskin.

4: This is a beautiful map but I would like to suggest that you consider adding a segment to the Butler Peak downhill trail - a segment that would tee off of that trail near the top, go north across the saddle near Grout Creek's source, then turn west and run parallel to Grout Creek til it intersected 2N13. This segment would make the upper part of the Butler Peak Trail a loop.

5: I have a neighbor who owns a huge tractor who asked me to let you know that he would like to volunteer his services repairing the washout on 2N13. Please let me know if you would like to contact him.
