Comments: I applaud the Forest service for considering the expansion of the rules to include class 1 e biking on previously prohibited trails. The more people understand what a class 1 ebike is, the more they will recognize them as an unobtrusive, clean green way for more biking enthusiasts to enjoy the amazing Recreational opportunities They provide. They are virtually silent and create zero emissions. They do not descend a grade any faster than a non assist bike and provide only moderate assistance in climbing up grades at a very reasonable pace.

Thanks
